

Gram Chain

www.gramchainnetwork.com

Gram Chain Network Intro

A high-performance Layer-1 blockchain built for compliant, real-world DeFi.

- 01 | Proof of Authority: Council-run validator nodes, ~7 sec finality
- 02 | Near-zero fees: transactions cost around \$0.01
- 03 | AI-ready & compliant: energy-efficient, built for regulated industries

GRAM CHAIN

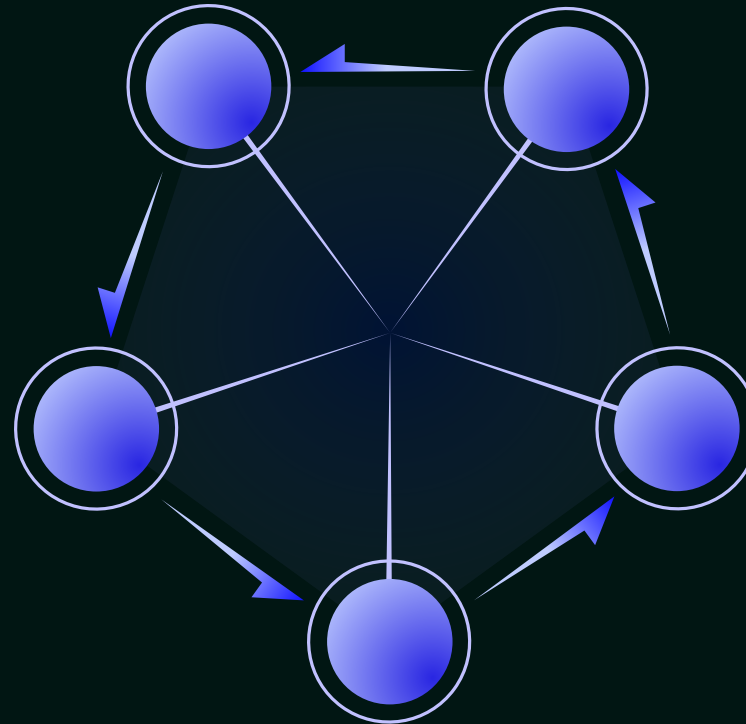

BUILDING THE
NEXT NETWORK LAYER

GramCoin (GCC) Intro

The native asset that powers the entire Gram Chain economy.

01

Network fuel: every transaction and contract call runs on GCC

BUILDING THE NEXT NETWORK LAYER

02

Holder rewards: validators, builders, and holders earn from network activity

03

Governance & staking: GCC doubles as the voting and staking asset

GINR Intro

GramChain's INR stablecoin, pegged 1:1 with the Indian Rupee.

01

Zero volatility: stable daily spending, no crypto price swings

02

Instant conversion: any crypto converts to GINR in seconds

03

Universal outbound: convert to USDT or withdraw via UPI

GCCScan *Explorer Intro*

The public window into
every block, wallet, and
contract on Gram Chain.

BUILDING THE
NEXT NETWORK LAYER

01

Live block & tx feed: real-time, searchable transactions and balances

02

Contract verification: publish and verify source code for audits

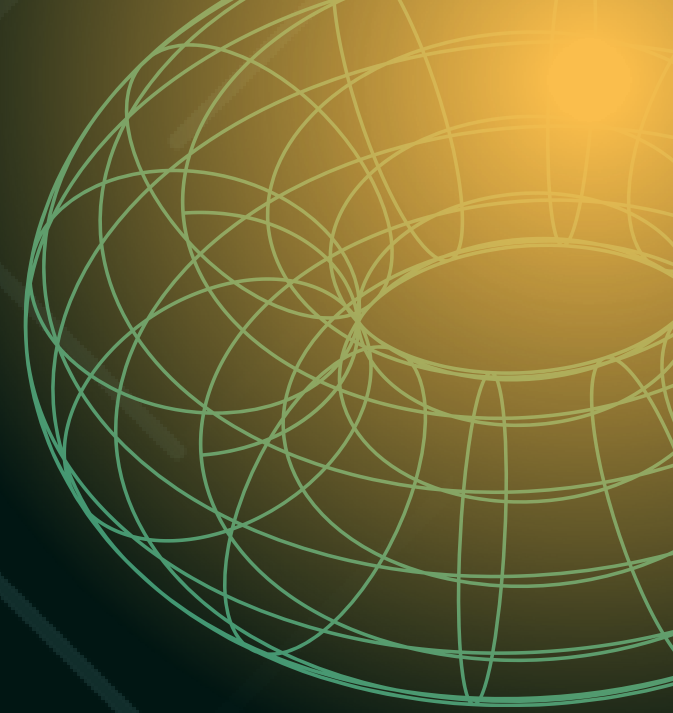

03

Network health stats: validator activity, fees, throughput at a glance

Smart Contracts & Tokens Intro

Native, EVM-compatible infrastructure for building on Gram Chain.

01

Token Services: mint and manage native tokens without custom code

02

Smart Contract Service: full EVM support for existing Solidity contracts

03

Asset Tokenization: hybrid token standard for real-world assets

GramPe Wallet Reborn

One wallet, five blockchains, and every payment habit India already has.

01

True multi-chain: Gram Chain, TON, TRON, Ethereum, BNB Chain

02

Built-in security: Face ID/fingerprint login, spend analytics

03

Everyday payments: scan-to-pay QR/UPI, instant transfers, bill settlement

Gram Centralised Exchange

A regulated, fiat-friendly on-ramp connecting rupees to the Gram ecosystem.

01

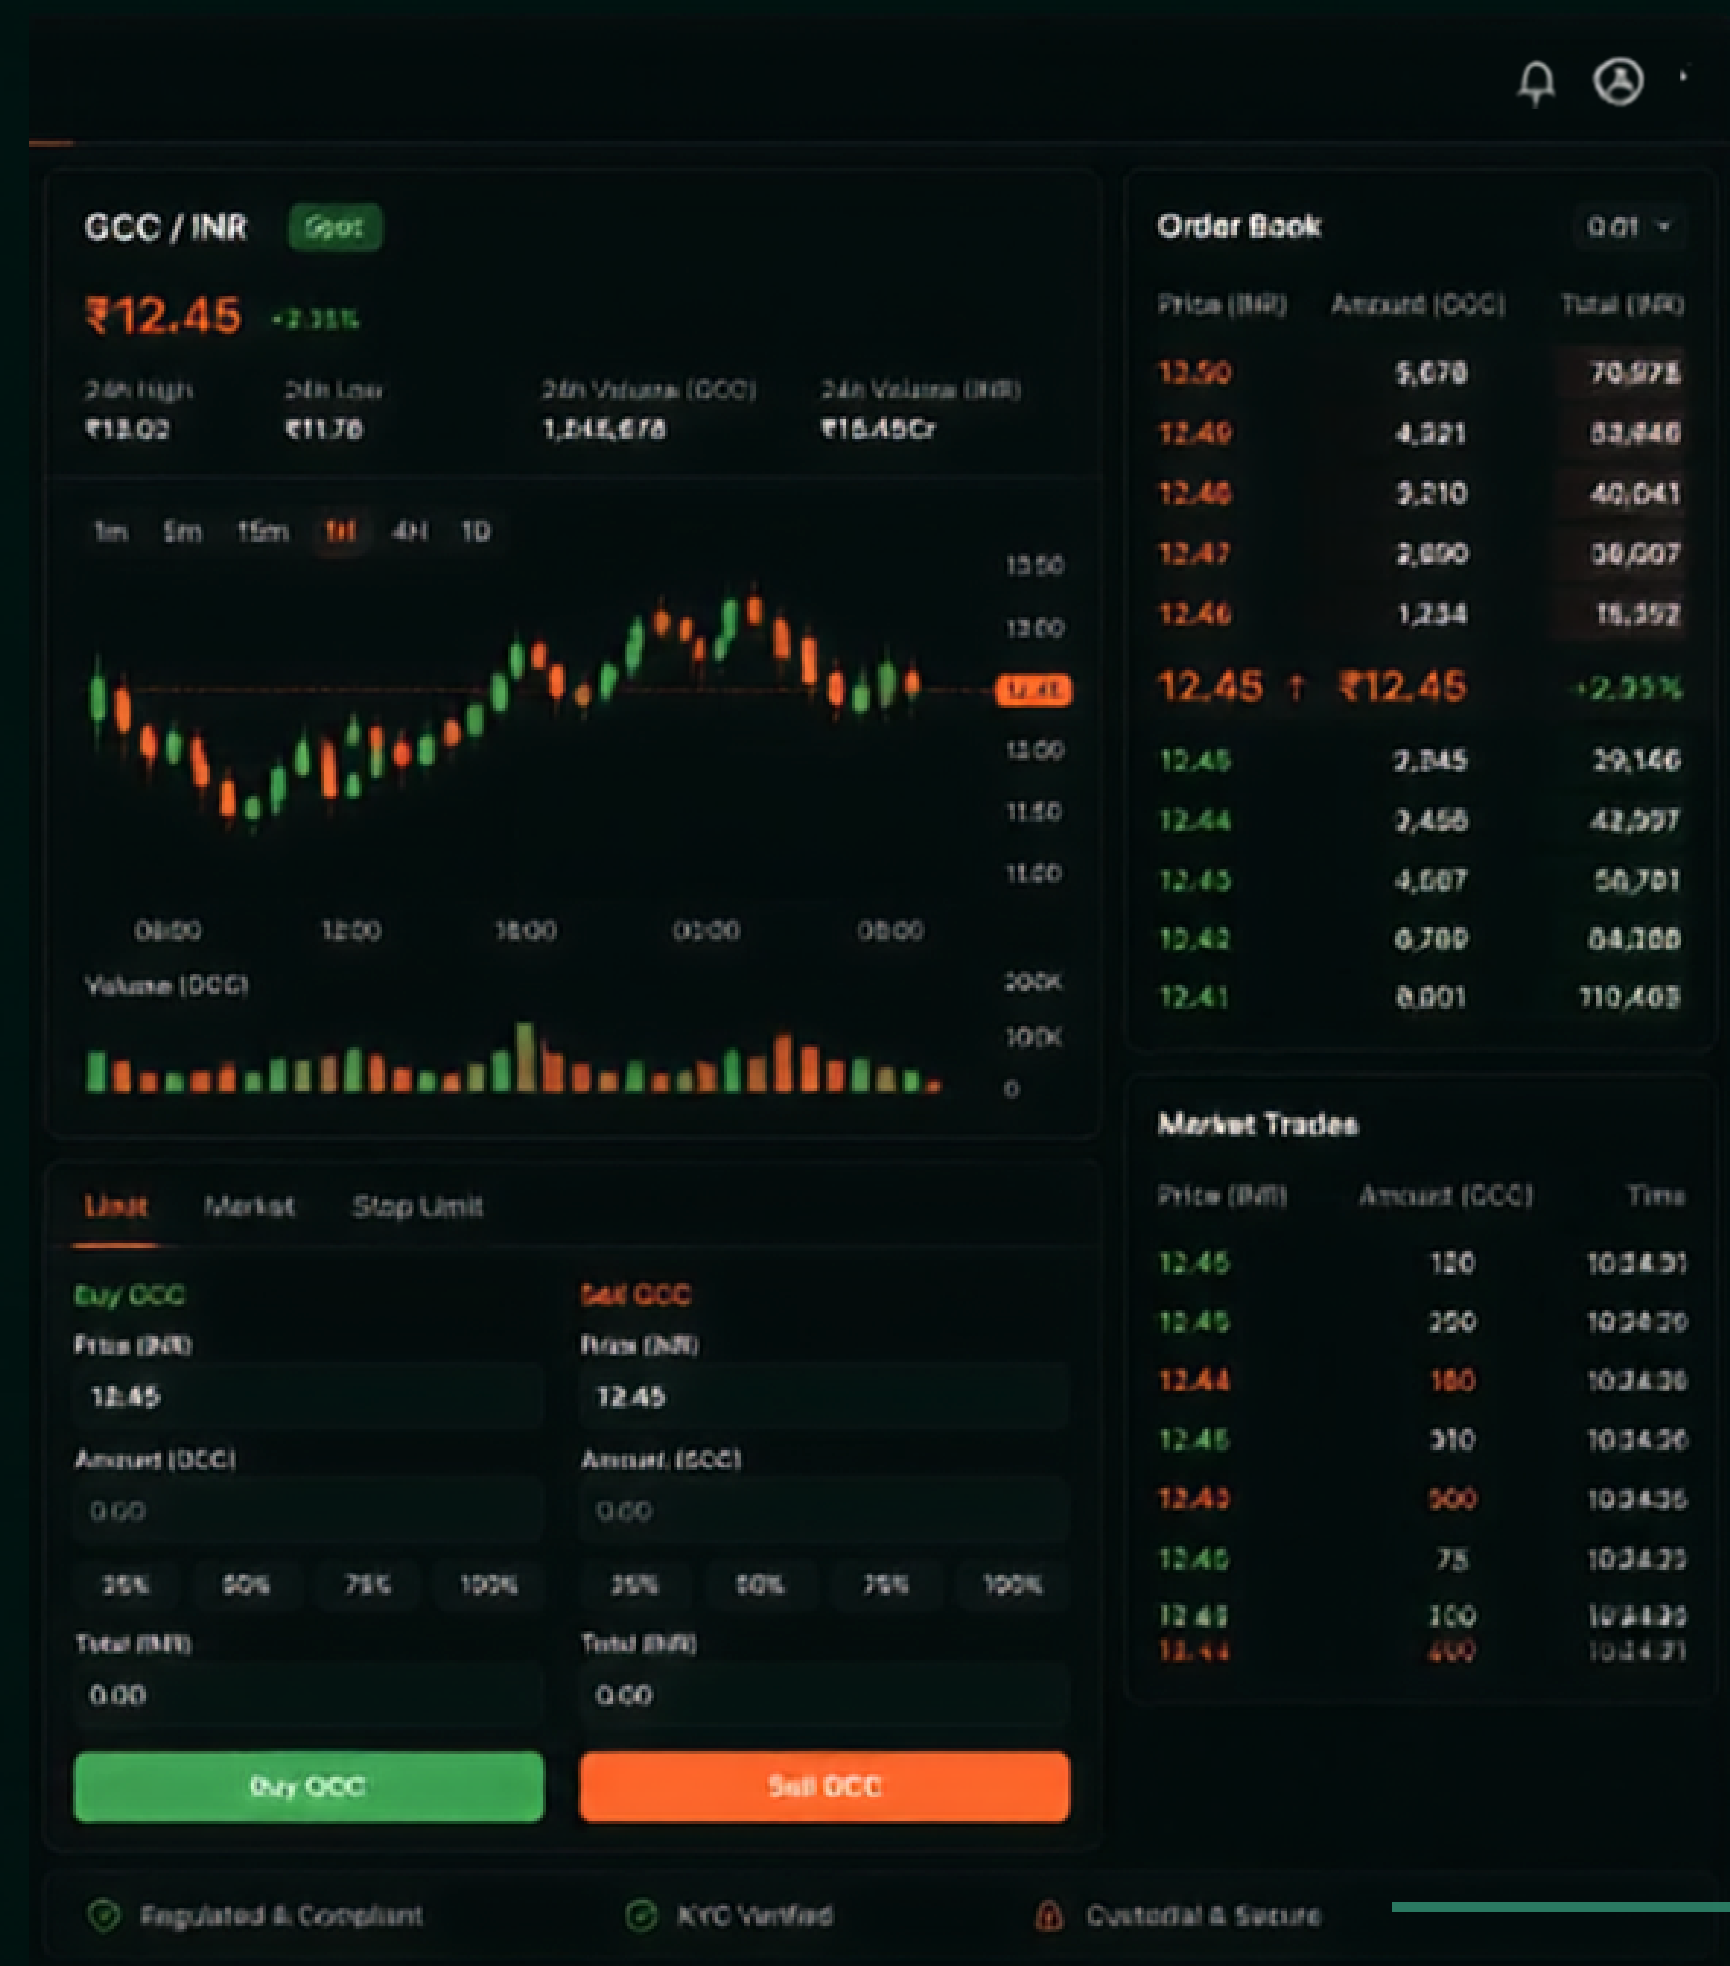

Direct INR on/off-ramp: bank transfer and UPI deposits

02

Spot markets: trade GCC, GINR, and major crypto pairs

03

Compliance-first: KYC-verified, custodial order matching

Gram's Decentralised Exchange

Native-to-token swaps, without ever leaving your wallet.

01

On-chain liquidity:
pooled across every supported chain

02

One-tap swaps:
native-to-GNR and cross-chain
in a single transaction

03

Non-custodial:
keys and funds stay with the user

Gram's AI-Based Trading Bot

Automated arbitrage logic working the spread betweenDEX pools and top exchanges.

- 01

High-frequency arbitrage: compares DEX liquidity vs. tier-1 CEX pricing
- 02

Always-on execution: captures the spread the moment it opens
- 03

Live status feed: deployment and performance on the AddTon dashboard
